- Concrete experience on dealing with a big data volume and performance

Results / Benefits

- Prepare the required Data integration Environment
- End to End implantation to Informatica data Integration
- Provide the required training for IT team
- Workshop with the IT to guide them and identify the development best practice
- Deliver required documentation

"Sharjah Government is a United Arab Emirates city on the Arabian Gulf. Traditionally more conservative than its southern neighbor, Dubai, Sharjah is widely considered the nation's cultural capital.
Sharjah joined the Union of the United Arab Emirates as a founding member on the 2nd of December 1971. In 1972, His Highness Sheikh Dr. Sultan bin Mohammed Al Qasimi (may God protect him) became the Ruler of the emirate and has since elevated the small emirate to a high position on the global level -- intellectually, culturally and commercially.

"BBI. Founded in 2009, BBI is a global information technology consultancy firm serving enterprise businesses in a diverse range of industries. From digital strategies to applications services to big data management and analytics, we've worked with our clients to survive today's business disruptions by providing them data driven digital transformation solutions that really make the change happen.''
