

Upgrading SAP B02 to SAP B04

Case study

Client  **vodafone**

KEY BUSINESS IMPERATIVE

Manage SAP BO4 upgrade Project for Vodafone Egypt , Implement BO4 , Integrate with AD , Deploy on Web Logic and Migrate old BO2 to BO4

IT INITIATIVE

Enhance Reporting and BI capabilities

The Challenge

- Huge no of BO2 reports (20,000 Reports)
- Integration with MS AD through Linux Env.
- Deploy Web Application through Weblogic (Not Tomcat – Recommended by SAP).
- Huge no of business users (2500 User)

BBI Advantage

- Strong experience with huge volume of data management
- 100% focused in Telecom
- Solid Hands-on expertise with different SAP BO environments
- Flexible and results oriented team

Results / Benefits

- Migration Done smoothly
- Up and running SAP BO4 system
- Going over all previous Vodafone pains from old BO2 system.
- Trained Vodafone Business and IT people on new SAP BO4.
- Successful migration and operation for Vodafone Corporate three Dashboards

"Vodafone Egypt Vodafone Egypt is the largest mobile network operator in Egypt in terms of active subscribers. It was launched in 1998 under its former name Click GSM. It covers various voice and data exchange services, as well as 4G,[3] 3G, ADSL and broadband Internet services.

Vodafone Egypt was initially headquartered in Maadi, Cairo since 1998 and until 2003; when Vodafone moved its headquarters to the Sixth of October City. some of the key members of the core network launch team were: Neil Marley, Ian Crawford and Peter Karney. Currently, all of Vodafone's core operations are run from Vodafone's campus at the Smart Village Technology Park.

"BBI. Founded in 2009, BBI is a global information technology consultancy firm serving enterprise businesses in a diverse range of industries. From digital strategies to applications services to big data management and analytics, we've worked with our clients to survive today's business disruptions by providing them data driven digital transformation solutions that really make the change happen."
