Openet IG Solution

Case study

Client

orange™

Openet Interaction Gateway is a central gateway that enables real-time, secure communications between client applications and an operator's network infrastructure. These client applications include applications installed on smart devices and Web applications running within a Web browser.

Openet Interaction Gateway is flexible, so operators can leverage existing resources and infrastructure when building a solution that offers a truly interactive experience to their subscribers.

Subscribers can view service usage and roaming spent. In this way, the likelihood of "bill shock'' is reduced while customer satisfaction is increased. Apps also include purchase and activation of new services, with the ability to configure these services.

IT INITIATIVE

Replacing Volubill PCRF solution to Openet Solution

The Challenge

- New technology that has not been implemented in the middle east before
- Integration with different Mobinil interfaces
- Many Security Considerations

BBI Advantage

- Experience in a new technology in Openet
- Team responsibility building plan for functional, performance, Integration and acceptance testing
- Team responsibility for testing

Results / Benefits

- Successful deployment of IG servers
- A corner stone for many new functionalities including Local subscribers, top-ups, Bucket migrations, consumption display and push notifications
- Key reference deployment for business in region Buckets

"Orange Egypt. Orange Egypt, formerly Mobinil, is the first mobile network operator in Egypt, founded on March 4, 1998. Orange provides voice and data exchange services, as well as 4G,[4] 3G, ADSL and broadband internet.
Orange was the first mobile carrier in Egypt to extend its network services to underground stations, having installed 17 Micro BTSs covering stations in Cairo in addition to the Al Azhar Tunnel.

"BBI. Founded in 2009, BBI is a global information technology consultancy firm serving enterprise businesses in a diverse range of industries. From digital strategies to applications services to big data management and analytics, we've worked with our clients to survive today's business disruptions by providing them data driven digital transformation solutions that really make the change happen.''
