Client

KEY BUSINESS IMPERATIVE

Review of Current Business Objects Environment and Architecture and Provide Enhancement Recommendation.

Identifying key issues impacting BO Environment stability including quick-wins and long-term recommendations. All this was delivered within very tight timeframe of only 9 days

PROJECT DESCRIPTION

Detailed BO Environment Review

IT INITIATIVE

DWH BO Architecture Review and Health Check

BBI supporting OTA for BO Architecture Review & Health Check + Enhancement Recommendations

THE CHALLENGE

With the launch of new DWH based on Business Objects as front end, the deployment of hundreds of operational reports has led to Environment instability. Hence there was an urgent need for total environment review to identify architecture gaps and recommend short and long-term resolutions. Additionally, there was a need to capitalize on BO advanced features for improved user experience

"Djezzy. is Algeria's principal mobile network operator, with over 17 million subscribers and more than 95% coverage as of end of 2015. The company offers a wide range of prepaid and postpaid mobile communication and Internet services. Djezzy was a subsidiary of the Egyptian company Global Telecom Holding. In 2014 the Algerian state bought 51% of it. Today, Djezzy is part of the VEON group (previously Vimplecom)- the fifth largest international communications group."

BBI ADVANTAGE

- With its strong team of experts in BO, BBI was able to deliver an effective remedy plan for BO environment by applying best practices on BO Server configurations suited for OTA need.
- Additionally, a long-term architectural design changes were recommended for ensuring sustainable stability and system scalability

"BBI. Founded in 2009, BBI is a global information technology consultancy firm serving enterprise businesses in a diverse range of industries. From digital strategies to applications services to big data management and analytics, we've worked with our clients to survive today's business disruptions by providing them data driven digital transformation solutions that really make the change happen."

SAP BUSINESS OBJECTS

Share insights and make better decisions with the SAP BusinessObjects Business Intelligence (BI) suite. By providing a flexible architecture, SAP BO analytics platform can support your growth – from a few users to tens of thousands of users, and from a single tool to multiple tools and interfaces.

Whether inside or outside of the organization, everyone needs access to the right information – from your CEO to business analysts, financial-based staff, suppliers, and partners.

With the SAP BusinessObjects BI platform, information is available throughout your entire organization – not just for selected processes, applications, or people.

RESULTS/BENEFITS

- Reviewed and Optimized the current Business Objects installations/configurations
- Reviewed and Optimized the load balancer configuration thus enhancing server performance
- Analyzed and Resolved production issues impacting environment stability
- Implemented security matrix enhancements
- Enabled key Business Objects features including Auditing and Emails Notifications
- Provided a Detailed environment review report
